

Before You Apply:

- Never apply Maxon-WB in rainy conditions or if rain is forecasted within the next 24 hrs.
- Maxon-WB is water-borne, do not apply in environments less than 50°F / 10°C or if forecast shows temperatures will drop to that range.
- Pay special attention in windy conditions, difficulty of application will be considerable.

Precautions:

- Protect/cover all glass in and around the work area. MAXON-WB is extremely hard to remove.
- Cover everything not intended to be treated. Incidental damage may occur on unintended surfaces.
- Spills or spray droplets in contact with glass should be removed immediately by flushing with water.

Application

- Use pump sprayer/Hudson sprayer for application. Tip size .026 072.
- 25% over-spray
- Wide Fan
- Do not let pool or puddle.
- One application is sufficient.
- Can be walked on in one hour

Clean up

Regular PPE. Soap and water.

Shelf Life

Shelf life is expected to be 5 years if container is new/sealed and stored in a cool, dry environment.
